

The printing house

work tools

the printing house of Bose

The printing house was started in 1984. At the moment it works with two little Heidelberg offset machines.

The main production is **oriented to the printing materials for our publishing house Edizioni Qiqajon**:

- *Testi di meditazione*: this collection of booklets, published six times a year, contains texts for meditation
- *Testi dei padri della chiesa*: this collection of booklets, published six times a year, contains the first translations into Italian of some precious writings by the Church Fathers
- *La vita religiosa*: collection of booklets about religious life

The printing house also prints most of the **materials (booklets, brochures, labels, etc.) for the different community's needs, including materials for the monastery workshops.**
